

# HOMOEOPATHY

## PRIMARY SCHOOL WORK SHEET

### History

1. When and by whom was Homoeopathy developed?

---

---

2. Explain what happened when Dr Hahnemann ate some bark of the quinine tree which was used as a cure for malaria.

---

---

German physician Dr Samuel Hahnemann (1755-1843)

3. From this experiment he developed his principle of similars, which means

---

---

4. What was the *Materia Medica Pura*?

---

### Diagnosis

5. *“The homoeopathic approach to medicine is holistic.”*

This means that the homoeopath will take all areas of a patient’s life into consideration when a diagnosis is made. Name the things that will be considered.

---

---

---

6. What is the repertory that the homoeopath consults and how is it used?

**Treatment**

7. Homoeopathy does not only treat illness, it also

---

---

8. What are homoeopathic medicines made from and in what forms are they produced?

---

---

---

9. *'Many of these substances would be harmful or toxic if taken in their original form, but the homoeopathic method of producing medicines renders them therapeutic but without toxicological effects.'*  
Explain this statement in your own words.
