GIS Workshop

14 June 2023
09.00 – 12.00
Old John Moffat Building, Basement
Spatial Analytics Lab (B4 Boardroom)

mncedisi.siteleki
@wits.ac.za

- Introduction to GIS: definition, applications, and benefits

- Overview of GIS software and tools

- Understanding spatial data and coordinate systems

- Introduction to GIS data types and formats

- Hands-on session: exploring GIS software interface and basic functions

Connecting the dots with GIS: an introduction

This 1-day workshop programme provides an overview of GIS software and tools, as well as basic skills needed to create maps, conduct spatial analysis, and visualise GIS data. Participants will have the opportunity to explore GIS software and work on hands-on exercises to practice their GIS skills.
