SAMMC

The 2nd South African Mathematical Modelling Contest

July 2019

SAMMC provides South African undergraduate students the opportunity to compete in a team setting using applied mathematics to solve real-world problems.

WHO

A team of up to four undergraduate students from your university

WHEN

Four days during July (exact dates will vary by institution)

WHY

- Develop new problem-solving skills
- Solve interesting real-world problems
- Win some cash prizes!

PREVIOUS PROBLEMS

- Design and model a zip line from the top of Table Mountain
- Determine an optimal strategy for STOP-GO control during roadworks
- Quantify the effect of home field advantage in Super Rugby

HOW

For more details and registration visit **http://appliedmaths.sun.ac.za/SAMMC/**
